Internal Procurement is an extremely powerful, user-friendly procurement and inventory management tool that can adapt to a variety of industries. For the user, easy access to accurate information about available inventory, expected deliveries and required stock is invaluable. For the manager, real-time monitoring of purchase costs over a given period is an unrivaled asset.

3. Purchases

Easily **MANAGE** your recurring orders by automating the creation of certain types of orders

QUALIFY suppliers by managing quotation requests

Securely **MANAGE** orders with multiple approval levels

OBTAIN the best possible price with the help of purchase statistics organized by supplier

4. Use

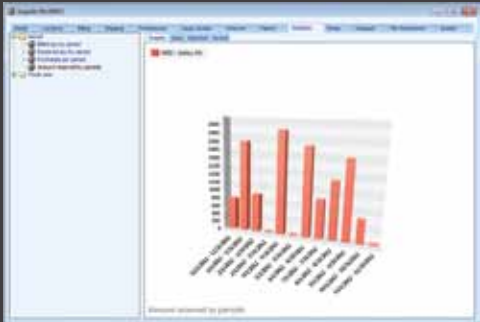

FIND and immediately see your inventory using bar code technology

FOLLOW the movement of inventory across multiple places

CONTINUE to operate while inputting your physical inventory

BENEFIT from a smooth flow of information between maintenance, production and inventory

ENJOY complete freedom with a PDA that has an integrated bar code reader

A screenshot of a purchase order form from Internal Procurement. The form includes a header with the company logo and name, a title 'Form of Internal Purchase order', and a unique identifier 'PO-0000174'. Below this, there are several sections for detailed information, including a table for line items with columns for item number, description, quantity, and price. The form is designed for data entry and printing.

48

A screenshot of a software interface showing a list of purchase orders. The table has columns for 'Order #', 'Date Requested', 'Requested By', and 'Customer #'. The data is organized into rows, each representing a different order. The interface includes a menu on the left and a title bar at the top.
