

THE SOFTWARE TOOL THAT GIVES YOU
FULL CONTROL OVER YOUR PRODUCTION

production

maximize performance

Simplify your production cycle
and **get** the results you want

Internal Production adapts to the type of production used in your business, maximizing its benefits. It improves your team's efficiency and increases quality standards while making planning easier.

3. Shipping

PREPARE BOL (bill of lading) and organize shipments from warehouse to dock doors in real time

EASILY manage multiple ship to locations per client

4. Billing

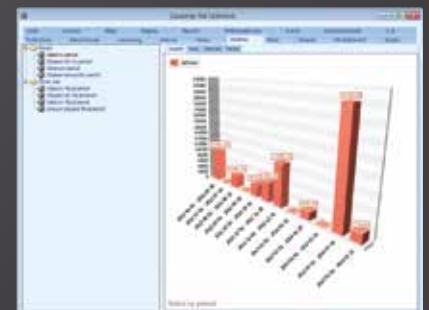

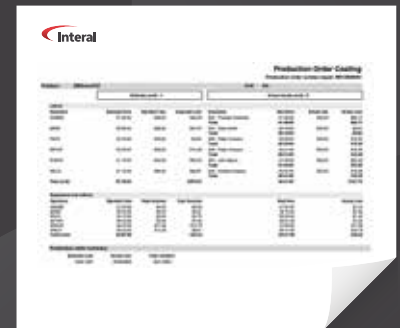

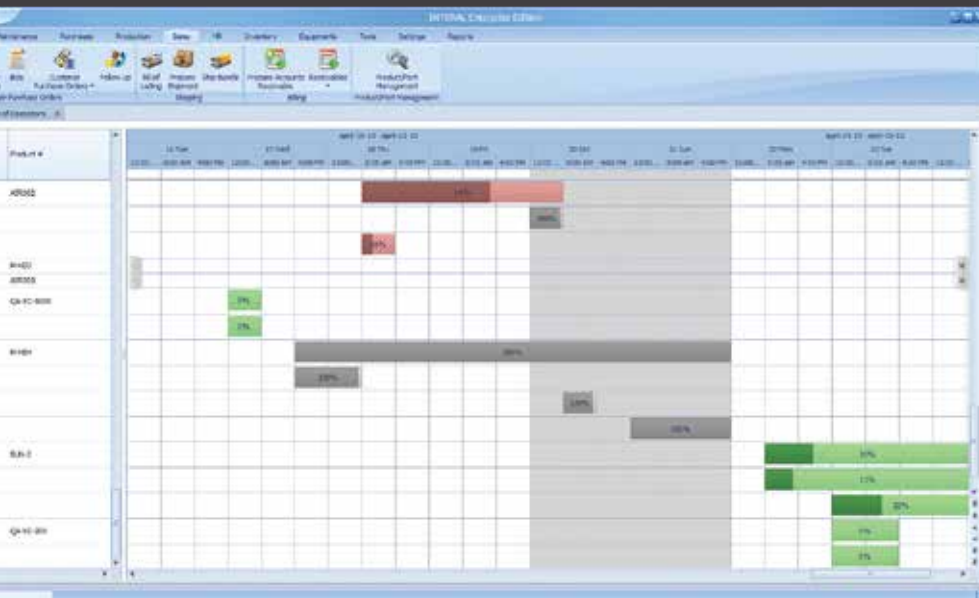

KEEP your accounting software: Interlal creates a bridge, allowing transactions to be moved between two programs

FACILITATE exports with multicurrency invoicing

5. Analysis

PERFORM key analyses, including the following:

- **MEASURE** employee productivity
- **CALCULATE** costs
- **VALIDATE** production costs
- **OPTIMIZE** production time
- **CHECK** actual consumption of raw materials against forecasts

Get the **best possible product** on time

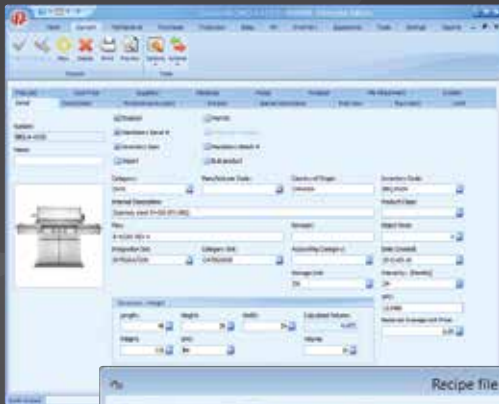

1. Sales

TRACK clients effectively, from first contact to delivery and beyond!

GET MORE out of customer care and reminder tools, so you never miss a sale

BENEFIT from fluid information, from purchase proposals to billing

INFORM your customers on the spot regarding product availability

Recipe file (General)

Product #: BBQ-A-4133 Recipe: General Manufacturing lead time: 05:00:00 Default recipe

Seq.	Operation #	Description	Time	Part's Time	Prop. Time	Repeat after	Delay (Days)	Queue Time
1	SETUP	Initial setup	00:30:00		00:00:00	0	0	00:00:00
2	SHEAR	Metal shearing	00:45:00		00:30:00	0	0	00:00:00
3	BEND	Metal bending	00:20:00		00:30:00	0	0	00:00:00
4	ASSEMB	Product assembling	00:30:00		00:00:00	0	0	00:00:00
5	WELD	Metal welding	00:40:00		00:30:00	0	0	01:30:00
6	PACK	Packaging	00:15:00		00:00:00	0	0	00:00:00

Record 3 of 6

2. Production

CONTROL the quality of production with a verification process and quarantine areas. Know who is working on what!

QUICKLY get essential information on finished products and stocks of raw materials for production

MAKE informed decisions by checking progress in real time

IMPROVE the efficiency of staff by simplifying their tasks

AVOID delays with the use of effective planning tools

Select options and **increase** your productivity

Internal Production is an Internal software module, recognized for its productivity management functions. To increase its potential uses, more options can be added.

INTERNAL WEB TECHNOLOGY

Consult your inventory and submit requisitions wherever you are!

MATERIAL SOLUTIONS

Choose the data input solution that is best adapted to your workplace.

BAR CODE TECHNOLOGY

Instantly enter accurate data using bar code technology.

COMPONENT IDENTIFICATION

Several labeling solutions are available to help identify your parts, products and projects.

Get the best performance from Interhal Production and Interhal's three other modules.

Interhal Maintenance module is powerful, user-friendly and adaptable to multiple use cases. Users will get the critical advantages of accurate and consistent information on equipment maintenance, buildings and vehicles. Managers will find the software to be a major asset in monitoring the financial implications of repairs.

Interhal Procurement is a user-friendly procurement and inventory management tool that can adapt to a variety of industries. For the user, easy access to accurate information about available inventory, expected deliveries and required stock is invaluable. For the manager, real-time monitoring of purchase costs over a given period is a critical source of information.

Interhal Time and Attendance is a very effective addon module to the Interhal core products. It allows managers to devote more time in decisions making matters leading to higher departmental productivity and profitability.

Interhal management solutions... meeting your highest expectations!
