

WEB Access

(For maintenance workers)

Make your life easier...

ENJOY an interface that gives you the information in real time, directly accessible to your employees and technicians.

FREE YOURSELF from certain tasks by enabling your employees to access and close their work-orders. They will be more independent and motivated. In addition, it will allow you to focus on your role as a manager.

Link a asset's computer and with a simple configuration you will be able to see all work-orders related to that asset.

OFFER your employees the opportunity to see their assigned tasks and complete them, anytime, all the time.

COMPLETELY integrated with **Internal Maintenance**, this web portal is the most logical and complete planning tool.

On top of that, access to the data is controlled by the security system of the **Internal Maintenance** application.

Internal Management Solutions ...
Solutions tailored to your needs !

SIMPLE AND EFFECTIVE

COMPLETELY configurable.

SECURE access with personalized login for each employee.

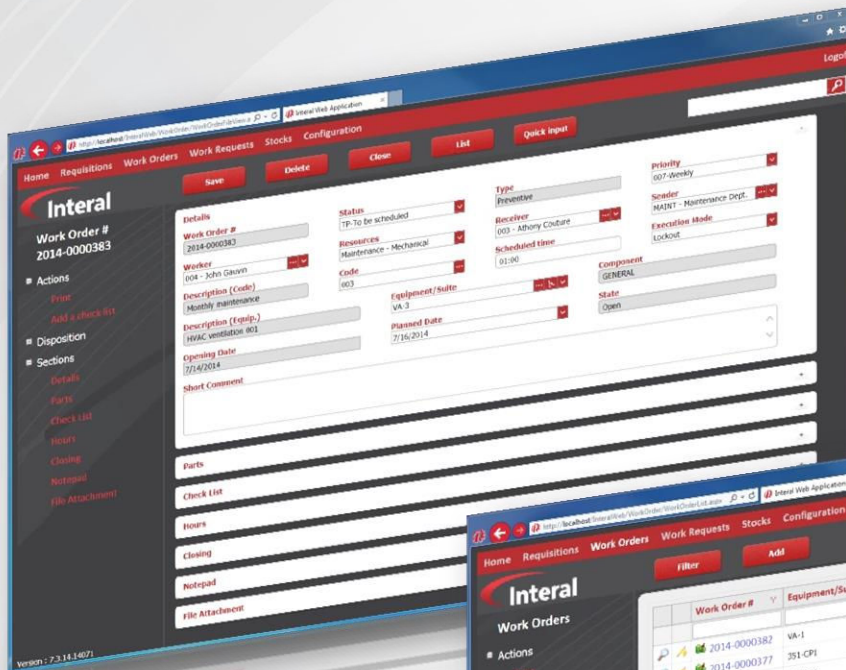

EASY deployment (nothing to install on the work-stations).
